

Protection and control system

GsmAlarm-420

PURPOSE

Individual and professional residential homes, flats, garages protection and control over GSM communication
Automatic gate, fence control

PROPERTIES

- Up to 5 controlled zones
- Up to 3 programmable controlled zones
- External microphone
- GSM network strength control

- Turning on/off by short call
- Energy power disconnection function
- Remote programming over SMS
- Cheap maintenance

GsmAlarm-420

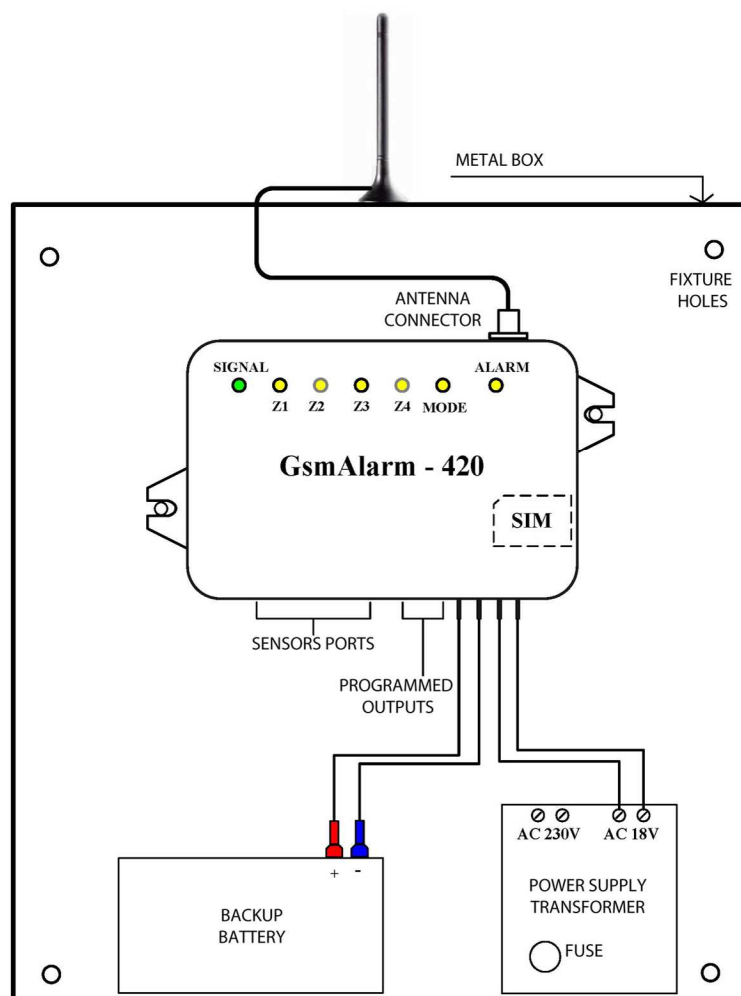

Technical characteristics

Number of users	5
Gate control mode (max qty. of users)	✓(250)
External microphone	✓
Audio entrance/exit time indication	✓ ⁴
Main power supply control	✓
Backup battery voltage control	✓
GSM communication strength control	✓
Turning on/off by short call	✓
Remote control over SMS and DTMF tones	✓
Remote programming over SMS	✓
Main power supply voltage	16-24Vac(12Vdc)
Backup battery capacity	12V/1.2Ah
Power consumption of the storage mode	<2W ⁷

² Using up to 4 keypads

⁷ Only GsmAlarm device without sensors, siren and backup battery

Installation

Recommended layout of system elements in 7/TRP20 type housing

PACKAGE COMPOSITION:

Device GsmAlarm-420 - 1 pcs.
GSM antenna with magnetic attachment and 2m connection cable - 1 pcs.
Microphone with 1.5 m connecting cable - 1 pcs.
Load resistors 2,2k $\pm 5\%$ - 15 pcs.
Cable with terminals for connecting battery - 1 pcs.
Description - 1 pcs.
